

K - BASE

BASE WITH HEATED AIR DRYER

Give your industrial locker room areas a new lease of life by adding a base with boot drying functionality. If you have the room, you can even opt for a solution with integrated seating.

Main features :

• Double use and space-saving

Its first use allows you to sit in front of your locker to change shoes. The $\frac{1}{2}$ drying tunnel located under the bench permits essentially to smartly and usefully use the free space available.

• Integrated drying

If you do not possess a drying shoes system in your locker, it will allow you to get this possibility, without changing your equipment. Otherwise, if your lockers are already drying, it will increase you drying capacity (4 extra pairs), without losing any space due to its drying system integrated below the bench.

• Heated air ventilation system

The heated air ventilation system helps to optimized the drying time (+/- 2h) via the tubes with clap. Disinfection is made by ozone lamps. Its heated air ventilation system allows to quickly dry 4 pairs of shoes.

• Modular

If you don't already have the lockers, we can supply blocks of 3 doors (K-VEST-40) or 4 doors (K-VEST-30).
