

K-PURE

Sanitizer

Destroys instantly all odours.

GENERAL FEATURES

Machine 2 in 1 electrically controlled

- + Targeted treatment for the equipment (shoes, helmets and gloves).
- + The treatment time can be scheduled from 6 to 20 seconds.
- + The continuous sanitation function allows to treat up to 100 pairs of boots in 10 minutes.
- + Single sided model.

Global deodorisation of the store

- + Continuous treatment of the ambient air.
- + 5 different dissemination powers according to the odours and surface to treat.
- + Can be proposed as self-service.

Technology

- + Uses a 100% natural, organic and perfectly harmless active principle disseminated through evaporation.
- + Safe for people's health and the environment.
- + Deoxidation of the air by an « electronic wind » purifying, which amplifies the active principle.
