

K-STORAGE

Boot / helmet rack

Designed for storing boots and helmets, the K-STORAGE can be quickly and easily adjusted without the need for tools, and optimizes storage space.

GENERAL FEATURES

+ Reinforced shelving and anti-tipping system

The shelves are reinforced. A person can get on the shelves to take the shoes at the top of the device. The anti-tipping system of the shelves holder secures the action.

+ Tool free-adjustment

The adjustment of the shelves position can easily be made without any tools. The shelves support is just hooked (no bolted) on the upright. Your area is progressive, so you will easily change the position of the shelves and add new ones effortlessly.

+ Aluminium custom

The K-STORAGE has the same end sides than all our range. The wave shaped aluminium end sides make the product design and elegant.

RECOMMENDATION

+ For a proper functioning of the model with support rollers, the ground must be flat and horizontal (plan to level if necessary).
